Me

I'm a self-taught multifaceted guy that studied both medicine and nursing before realising I was creatively understimulated when only designing and developing as a hobby/freelance.

I have a curious mind and get along really well with most people. I care about my friends + family and thrive when helping others.

I'm a adrenalin junkie (kitesurfing, rollerskating, snow-boarding) but also love e.g. cykling for hours and rowing slowly through the harbour on a sunny sunday afternoon.

Recent Public Projects

Gidole — Font. An open source modern DIN and my forray into typography. Very well re-cieved. "Worlds best open source fonts" - showcased by GitHub together with titans as the only newbie project

Monoid — Font. An open source coding font. Also very well recieved - by e.g. the guy behind Adobe Source Sans. I wrote and also talked about it (video up soon...).

Animal Note Heads — Open source music learning platform in it's infant stages with website, sheets, iOS app, vinyl stickers and more.
WIP: Wooden puzzle, desktop app (using Electron), improved sheets and more.

FontForge — I've been focussing on trying to make it easier to use - improving menu struckture, created mac installer, updated UI and reskinned website amongst other things

Older Public Projects

Legalis.dk — Wordpress website, simplified backend and metro-inspired menu.
Logo design.

Adacta-law.dk — Wordpress website, simplified backend.

Misc. Apps — 3D Dermatomes, KBX, Danske Love - All graphics, UI/UX, text, 3D rig + more.
